

Feature: Branding

Mrlwan

1 Branding

The `nope-branding` frontmatter key points at a branding note whose frontmatter (title page, headers/footers, numbering, language) is applied to this export. Run the **Create branding template** command to scaffold one, or copy `branding-template` to build your own.

Body text so the page is not empty. Numbered headings and the title page come from the branding note.

1.1 A Subsection

More body text under a numbered subsection.
