

Obsidian Markup

Comments, highlights and plain Markdown lists.

Comments (%% . . . %%)

Before the comment, and after the comment.

After the hidden region.

Highlights (== . . . ==)

First **highlight**, second **also marked**, third **end**.

This is **important and central word** **plus rest** in the sentence.

Lists

- Write the atomic note in Obsidian as usual
 - Embed it with ! [[Note]] to pull its content into the document
 - Works at any nesting depth
1. Add the matching `latex-env` frontmatter to the note
 2. Export the document to PDF through the Docker pipeline

Unsupported Characters

Stripped without crashing the export:
