

Slice Embeds

Embeds can pull in a whole note, a heading section or a single block.

Heading-Slice

Only the “Middle Section” including its sub-headings should appear:

Middle Section

This is the content of the middle section. If the slice test works correctly, **exactly this section including the sub-headings** should land in the export — the first and third sections must not appear.

Sub-Heading A Content under sub-heading A. Belongs to the middle section (level 2 under level 1), so it will be embedded with it.

Sub-Heading B Content under sub-heading B. Here too: belongs to the middle section.

Block-ID-Slice

Only the single paragraphs marked with `^para-first / ^para-second`:

This is the Paragraph with the `para-first`Block in the end.

This is another paragraph referenced by `para` suffix.

Fallback for Broken Anchor

A plain-text notice instead of the whole note:

[Heading not found: slice-source#Does-Not-Exist]

[Block ID not found: slice-source#^block-does-not-exist]

At vero eos et accusam et justo duo dolores et ea rebum. Stet clita kasd gubergren, no sea takimata sanctus est Lorem ipsum dolor sit amet.

Wikilinks

Note link without anchor: slice-source — jumps to the first embed.

Note link with display alias: alternative display.

Heading link to embedded heading: slice-source#Middle Section.

Block-ID link: slice-para#^para-first.

Link to non-embedded note: A-Note-We-Did-Not-Embed — plain text fallback.
