1 Stat blocks

A `statblock` fence in Fantasy Statblock syntax renders live in Obsidian and exports through the `statblock` environment defined in the custom template, from one source. Each scalar key becomes `\nope<key>`; a block list like `traits:` becomes numbered `\nope<key><N>-<subkey>` commands.

The stat block look is inspired by the DnD 5e LaTeX template by the rpgTeX team (MIT). Thanks for the groundwork.
