

Callouts

Write a callout with `> [! type] Title`. One block per type below.

Important Notice This is a simple note callout with a title.

The second line belongs to the same block.

TLDR

Caution `latexmkrc` matters

What happens here on the second line

Beware Never `rm -rf *`

Critical Back up before a major TeX Live update.

Multi-line

- First point - Second point - Third point

Another sentence here

Code

```
makeglossaries central_document
```

Then run `latexmk -pdf` again.

simple info box for an unknown type!

Normal blockquote without a callout marker
